

Gold rush

06.11.2007

The gold, the silver and the index HUI left for a new "gold rush". The subject of this article is to remind the objectives of increase of the ounce of gold, silver of the HUI already indicated in previous subjects drafted during more quiet periods.

The price of the ounce of gold:

The price of the ounce of gold broke its resistance of [725 dollars the ounce of gold \(objective of 2003\)](#). This allows the gold to aim at the Dizzying prices of [1980s corrected by the inflation \(objective of February, 2007\)](#).

The price of the ounce of silver:

The ounce of silver fights with its resistance of [14 and 15 dollars the ounce \(objective 2004\)](#). Once the hoarse resistance, it is [22 - 30 dollars the ounce of silver that is aimed \(objective of June, 2007\)](#).

The HUI index:

The resistance [400 is broken for a long time \(objective 2005\)](#), the following target "minimum" is in the zone of [565 points \(objective of November, 2006\)](#).

Ratio silver mine :

[The ratio of the silvermines](#) which I built myself, to know if silvermines are in zone of purchase or sale, indicates a delay importing silvermines with regard to the price of the ounce of silver, having itself a delay on the ounce of gold ...

To summarize:

- The ounce of gold is a little early.
 - The HUI is very punctual, as usually for some years.
 - The ounce of silver is a little bit late, it battles with its resistance in 15 dollars the ounce.
- The ratio of silvermines indicates weak prices for silvermines.

Once again this is only an opinion, and thus to consume in moderation.
